1. The drawings were received on February 2, 2006. These drawings are approved.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-15 is that none of the references cited, taken either singly or in combination, teach or disclose a method of recovering hydrocarbon trapped in a hydrate formation, as in the claimed combinations, including the step (a) of claim 1 wherein the hydrate formation is contacted with an aqueous solution comprising 10% to 75% by weight of a formate or acetate salt of an alkali metal, or a mixture of such salts thereby liberating hydrocarbon from the hydrate formation and producing a mixture of hydrocarbon and water vapor. For example, Chatterji et al (5,713,416), Cottle (4,007,787) and McGuire (4,424,866) all disclose the release and recovery of hydrocarbons, such as natural gas, from subterranean gas hydrate deposits by injection/circulation of a hot brine fluid, which may be effected in conjunction with hydraulic fracturing of the hydrate-bearing formation(s), but do not disclose the injection or use of an alkali metal acetate or formate salt, as required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 571-272-7036. The examiner can normally be reached on M-F (6:30 - 3:00).
